

jPDFAssemble™

Java library to assemble PDFs

Combine, merge, and split PDF documents
Add or manipulate bookmarks
Integrate in your Java or Web applications

jPDFAssemble can work with PDF documents from files, URLs and input streams and save documents to files and output streams.

- **Split PDF documents**
 - extract, delete pages from existing documents
- **Merge PDF documents**
 - insert pages from other PDF documents into new or existing PDF documents
 - append PDF documents into existing documents
- **Create new bookmarks or edit existing bookmarks / outlines**
- **Update document meta-data information**
 - such as author, description, title...
- **Save to the local file system or to Java output streams**
 - to serve documents from J2EE application directly to client browser without any temporary files
- **100% Java** –your application remains platform independent
- **No third party software** or drivers required
