

jWordConvert™

Java library to convert Word files to PDF

NEW

**Convert and Print MS Word™ documents
directly from your Java applications**

jWordConvert™ is a Java library that can read and render Word documents natively to convert to PDF, to images, or to print the documents automatically.

jWordConvert works without user intervention and without the need for any other software.

The library runs on any platform: Windows, Linux or Solaris, in a server environment or integrated into a desktop application.

- Convert Word 97-2003 and Word 2007-10 files to PDF
- Merge multiple files into one PDF document
- Set permissions and passwords on PDF documents
- Convert pages to JPEG, TIFF or PNG images
- Print documents automatically to default or named printers
- Support for JDK 1.5.0 and above
- 100% Java –your application remains platform independent
- No third party software or drivers required
